

# COMPLETE WIND PROJECTS ON TIME & WITHIN BUDGET

**Keep your project on track through improved job site efficiency and safety with lifting and rigging hardware from The Crosby Group.**

- Get the product you need, when you need it through a global network of 3,000+ authorized distributors with stock ready to ship.
- Ensure a well-trained workforce with access to extensive training curriculum and industry experience.
- Reduce time between lifts with quick-release shackle bolt securement and an adjustable, lightweight chain sling system.
- Prevent incidents through the use of top-quality hardware from a highly vertically integrated manufacturer.
- Create smarter lift plans with center of gravity calculations using wireless load cells.
- Obtain product authenticity certificates online at any time.

Partner with the leading total rigging provider  
with the most comprehensive product portfolio.

**Crosby®**

**G-2130 & G-2140 Shackles**

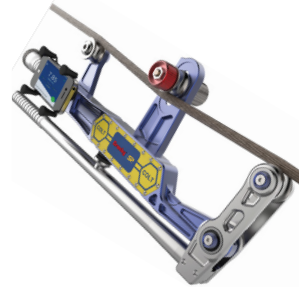

Quenched & tempered and hot dip galvanized for max strength and designed for wind turbine applications

**Crosby | airpes®**

**Offshore Wind Tools**

Innovative tools designed for offshore blades, nacelles, towers, hubs, and more

**Crosby | SP**

**Clamp On Line Tensionmeter (COLT)**

Lightweight, fast and accurate measurement of tensions up to 11,000lb or 5000 kg and up to 1" or 25mm wire rope diameter

**Crosby | SP**

**Wireless Load Cells & INSIGHT**

1000m/3280ft range, standard, ATEX/IECEX, compression and tension load monitoring, centre of gravity and datalogging software

**GUNNEBO Industries**

**GrabiQ® LKBK Swivel Safety Hooks**

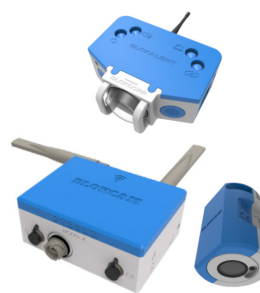

Easy access trigger with a protective ridge, 360-degree load rated rotation design, griplatch for easier inspections and reduced damage risk

**GUNNEBO Industries**

**De-centered Lifting Points**

Versatile, RFID-prepared lifting point with stay-up feature for easy on-hooking, available in UNC or metric threading, with long bolt and nut

**Crosby | BLOKCAM**

**BlokCam & BlokAlert**

Wireless audio-visual warning systems that can easily be deployed to the hook block or boom tip of a crane for enhanced safety

**Crosby®**

**HR-125UNC Swivel Hoist Ring**

360° swivel and 180° pivot action, all components are alloy steel, Quenched and Tempered

**Crosby | feubo**

**High Fatigue Life Shackle**

Superior fatigue life, DNV-GL type approved, features the unique 'Fastlock' system, proven to reduce project downtime

**Crosby | feubo**

**ROV H-Links**

Operatable H-links with class LTM approval and Crosby Feubo forged Nautilus slim swivel, forged, operational at any water depth

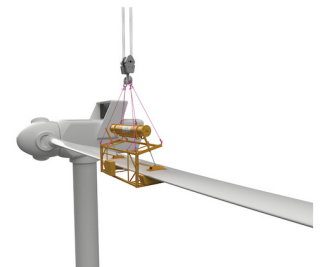

**Crosby iP**

**IPU10 Universal Lifting Clamp**

Full 180° turning range for material transfer, turning or moving, lock open/closed ability with latch

**UNIQUE PARTNERSHIP**

**VERTON**

**Windmaster Solution**

The Crosby Group has partnered with Verton to deliver the world's first remote load-control system
