

COMPLETE WIND PROJECTS ON TIME & WITHIN BUDGET

Keep your project on track through improved job site efficiency and safety with lifting and rigging hardware from The Crosby Group.

- Get the product you need, when you need it through a global network of 3,000+ authorized distributors with stock ready to ship.
- Ensure a well-trained workforce with access to extensive training curriculum and industry experience.
- Reduce time between lifts with quick-release shackle bolt securement and an adjustable, lightweight chain sling system.
- Prevent incidents through the use of top-quality hardware from a highly vertically integrated manufacturer.
- Create smarter lift plans with center of gravity calculations using wireless load cells.
- Obtain product authenticity certificates online at any time.

theCrosbygroup®

**Partner with the leading
total rigging hardware provider
with the most comprehensive
training programs.**

Featured product

Crosby®

G-2160 Wide Body Shackles

Quenched & tempered for max strength and designed for wind turbine applications, Easy-Loc bolt, capacities up to 1550t

Featured product

GUNNEBO
Industries

GrabiQ® LKBK Swivel Safety Hooks

Easy access trigger with a protective ridge, 360-degree load rated rotation design, griplatch for easier inspections and reduced damage risk

Featured product

Crosby® | **SP**

Compression Load Cells & Software

Range of wireless tension and compression load cells, software for datalogging and COG, safely monitor load before and during lift

Featured product

Crosby | **airpes®**

Onshore Wind Solutions

Innovative lifting and rotating tools designed onshore blades, nacelles, towers, hubs, and more

theCrosbygroup®

thecrosbygroup.com/wind

The Crosby Group is a global leader in innovating, developing, manufacturing and supplying products used in lifting, rigging, load monitoring, material handling and other related applications, with brands such as Crosby, Gunnebo Industries, Crosby Straightpoint, Crosby Airpes, Crosby BlokCam, McKissick, Trawlex, Lebus, and Crosby IP.

With operations around the world, the company provides a broad range of products for the most demanding applications with uncompromising quality that exceeds industry standards. The Crosby Group provides an unparalleled training program, supported by industry experience dating back hundreds of years, focusing on the safe use of the groups' products.
